TABLE OF CONTENTS

Section 1: Disease From Potential Bioterrorist Agents*

Anthrax 4
Botulism 8
Brucellosis 13
Equine Encephalomyelitis 18
Glanders 24
Melioidosis 28
Plague 32
Psittacosis 36
Q Fever 39
Tularemia 43
Viral Hemorrhagic Fevers (Ebola and Marburg) 47

Section 2: High-Consequence Livestock Pathogens*

African Swine Fever 54
Classical Swine Fever 57
Foot-and-Mouth Disease 60
Influenza 63
Newcastle Disease 77
Rift Valley Fever 80
Swine Vesicular Disease 83
Vesicular Stomatitis 85

Section 3: Additional Resources

Missouri Emergency Response Protocol for Reporting a Foreign Animal Disease 90
Reportable Diseases and Follow-Up Guidelines 92
General Signs of Reportable Animal and Poultry Diseases 96
Biosecurity of Veterinary Practices 97
Suggestions to Protect Your Livestock Operation 98
Disinfection of Premises and Fomites 99
Vesicular Diseases Reference Chart 100
Exotic Newcastle Disease and Highly Pathogenic Avian Influenza Reference Chart 102

Section 4: Photographs

African Swine Fever 104
Avian Influenza, Highly Pathogenic 104
Exotic Newcastle Disease 105
Foot-and-Mouth Disease 105
Hog Cholera/Classical Swine Fever 107
Rift Valley Fever 108
Swine Vesicular Disease 108
Vesicular Stomatitis 108

*The classification system chosen for this manual consists of the primary Category A and Category B bioterrorist agents (Section I), as listed by the Centers for Disease Control and Prevention, plus additional high-consequence livestock pathogens (Section II). These listings are not mutually exclusive, as some “high-consequence livestock pathogens” could be classified as “potential bioterrorist agents” and vice versa.
